

Helping diabetic employees see life to the fullest

While routine eye exams are important for everyone, it's even more so for the 1 out of every 12 Americans with diabetes.¹ Diabetes not only comes with a greater risk of vision-related complications such as glaucoma and cataracts – it's also the leading cause of blindness in adults.²

Access to increased exams to detect vision complications from diabetes

Diagnostic testing every 6 months

That's why our Diabetic Eye Care Benefit puts your employees with type 1 or 2 diabetes in focus. We provide access to more frequent and in-depth eye care – helping to detect and minimize vision-related complications early on.

Our Diabetic Eye Care Benefit includes:

- An office visit and diagnostic testing once every 6 months
- Diagnostic tests such as gonioscopy, extended ophthalmology, fundus photography and scanning laser (offered at the provider's discretion)

Give your employees access to the vision care their eyes deserve
