

Andrew Neighbors, O.D Associate Medical Director

Dr. Andrew Neighbors is an experienced optometrist with more than 12 years in the eye care industry, including more than 7 years with EyeMed.

As a medical director at EyeMed, Dr. Neighbors provides critical clinical expertise and guidance, supporting the organization's mission to deliver superior vision care services. He plays a key role in ensuring quality of care across EyeMed's provider network, maintaining compliance with regulatory standards and contributing to the development of innovative products that improve patient outcomes and satisfaction. Dr. Neighbors is also actively involved in broker services, presentations to benefit professionals, provider network development, collaborations with health partners, as well as Diversity, Equity and Inclusion initiatives. Dr. Neighbors is known for his patient-focused approach, excelling at making patients feel comfortable even in unusual optical circumstances. His passion for technology and telemedicine further enhances his effectiveness in his role, making him an invaluable asset to the EyeMed team.

Before stepping into his current role, Dr. Neighbors served as the primary doctor for EyeMed's Pop-Up Clinics. He also managed his own optometry practice within a Target Optical location and has experience in virtual patient care.

Dr. Neighbors earned his doctor of optometry degree from the Southern College of Optometry and holds a bachelor's degree in biology from Arkansas State University.
