

# Bringing eye care and eyewear to you

## Vision care delivered right to your door

Convenience is what our Pop-up Clinic is all about; it's a fully-equipped vision clinic right in your own facility. No need for employees to leave the office. No extra commutes. No hassle finding a time that fits everyone's schedule.

### EMPLOYEES CAN:

**Receive an eye exam.** More than a basic screening; this is a 15-20 minute comprehensive exam by a local optometrist. The technology they use can help identify even the slightest vision issue or early sign of some serious health conditions.

**Shop the latest styles.** Every employee is welcome to browse the on-site frame store – even if they don't get an eye exam or aren't enrolled. They can choose from hundreds of brand name frames, sunglasses and contacts, then easily apply their benefits and discounts at checkout (many frames may be 100% covered by the benefit allowance).

### YOU SUPPLY THE SPACE. WE'LL TAKE CARE OF THE REST

- Promotional materials and appointment reminders
- A link to your own microsite for scheduling eye exam appointments
- Flexible days and hours
- No-fuss clinic setup and removal

Eyewear can be delivered to the employee's home, office or local store—for free

On-site store features 400+ frames, including top designer brands
